Night for the Youth

There aren't enough evening events made just for 16 to 20 year olds. When they want to go out at night and aren't able to, they will sneak out which will make them get into dangerous situations. By secretly going out, the trust between the parent and the child is then lost. Our service EVENT 16 20 will provide evening entertainment just for these 16 to 20 year olds.

Dangers of the Night

No parent wants their child to be put into dangerous situations or environments. A child will be in danger when they are exposed to alcohol when they are underage. The parent will no longer need to worry about their child being influenced or pressured by others to drink or be in the presence of alcohol when they attend our concerts because unlike other concerts, our concerts are only for 16 to 20 year olds, making it an alcohol-free environment. Another danger that their child won't get into when they attend our concerts is the danger of the streets at night. All parents are afraid of letting their child out at night because they fear that something will happen in the dark streets of the night but, when their child is inside the venue, they will no longer be on the scary streets of the city. We will also provide as much security and safety as we can within the concert hall to ensure that everyone is having a fun and safe time.

Have a Fun Night

We came up with this service in order to allow youth ages 16 to 20 to be able to enjoy the night without being in danger. By attending our concerts, they will also be able to socialize with those that are around the same age as them about their similar interests. When a youth attends to five concerts through our service, they will then be able to attend to one concert of their choice free of charge. The admission fee will also only be around $15 per concert because we want to make it affordable to all youth and encourage them to stay in safe environments, doing safe things, and enjoying the night through live entertainment.
